**The Most Important Hazards**

**Adverse Human Health Effects :**

There are no significant hazards expected with intended use.

**Potential Health Effects**

**Primary Entry Routes :**

Inhalation ; Yes

Skin ; Yes

Ingestion ; Yes

**Environmental Effects :**

There are no significant hazards expected with intended use.

**Physical and Chemical Hazards :**

There are no significant hazards expected with intended use.

**Specific Hazards :**

Dust explosion (like most finely grained organic powders)

**Main Symptoms :**

**Acute Inhalation Toxicity**

Exposure to excessive amount of dust may cause physical irritation to respiratory tract.

**Acute Oral Toxicity**

Low acute toxicity in animal experiment.

**Acute Eye Irritation**

May cause slight transient irritation.

**Acute Skin Irritation**

May be non-irritant.

**Sensitization**

From test no apparent significant hazards are expected . (Only few cases reported on incidental allergy-related conjunctivitis or dermatitis.)

**Chronic Effect**

Slight pulmonary fibrosis has been reported in rats upon chronic inhalation exposure to a toner at 4mg/m<sup>3</sup> every day for 2 years. No pulmonary change was found at 1mg/m<sup>3</sup>. These findings show that exposure to excessive amounts of powder may cause damage to lungs. However, normal use and handling of this product as intended, does not result in inhalation of excessive amounts of powder.

**Carcinogenicity**

Titanium dioxide contained in this product is classified to Group 2B of IARC as the result of inhalation test in use of rat.

But oral/skin test does not show carcinogenicity.

In the animal experiment with very high concentration of titanium dioxide (excessive burden of rat's lungs clearance mechanism (overload phenomenon)), the rat alone showed lung tumor.

Under a normal use practice, the concentration should be far lower than the above; and it is assumed that there is no such use.

Also, relation between respiratory disease and work exposure of titanium dioxide is not observed with epidemiological survey.

**Medical Conditions Aggravated by Exposure**

Not applicable

**Classification of the Chemical Product**

This mixture is not classified as dangerous.

#### Section4 : First Aid Measures

**Inhalation :**

Remove from exposure into fresh air and rinse mouth with water. Seek medical advice.

Drink several glasses of water to dilute ingested toner. Seek medical advice.

**Immediate Medical Attention :**

Immediate medical attention is not required.

### Specific Effects

Carcinogenicity :  
In 2008 IARC the re-evaluated Titanium dioxide as a Group 2B carcinogen for which there is inadequate human evidence, but sufficient animal evidence.  
The latter is based upon the development of lung tumors in rats receiving chronic inhalation exposures to Titanium dioxide at levels that induce particle overload of the lung.  
Use of this product, as intended, dose not result in inhalation of excessive dust.  
Epidemiological study to date have not revealed any evidence of the relationbetween exposure to titanium dioxide and diseases of the respiratory tract beyond general effects of dust.
